ivitec GmbH

**Job-Titel:**
Working Student Audio Recognition - Spanish speaking (m/f/d)

**Job-Beschreibung**

Attention Spanish speakers:

Interested in media content analysis? Become part of the ivitec team!

Who we are:
ivitec GmbH is a well-established medium-sized software company that emerged from the Fraunhofer IGD in Darmstadt, with a worldwide customer base and offices in Darmstadt and Hamburg. Our revolutionary video analysis technology enables clients to automatically find and compare multimedia content in TV, archives or on the Internet, e.g. for video and market research, second screen applications or to check license usage. Further information: www.ivitec.com

We are currently looking for you to strengthen our young and creative software department at the Darmstadt location as soon as possible as:

Working Student Audio Recognition - Spanish speaking (m/f/d)

Your Profile and Tasks:

You have a good command of Spanish, native or close-to-native, are currently studying computer science, information technology, electrical engineering, communications engineering or similar and you are interested in software in the media environment around TV and Internet. You are interested in applications in the area "Automated Content Recognition"? You will support our development team with the following:

- Participation in the development of a native speech recognition system for Spanish / Catalan radio advertisements as part of a project for a Spanish customer. **Specific area: Spanish Audio Recognition.**
- The advertisements are spoken live by the moderators.
- You understand what is being said and can adapt our existing SW tools so that the texts can be qualified for further treatment by human operators.

What we offer:

- Above market payment with assumed 10-20 hours per week.
- You’ll become familiar with our entire toolset for audio and video recognition.
- One of our senior developers will design the framework concept and will be available to you as a contact at any time.
- You work closely together with the Spanish customer team in Madrid.
- There are already many prospects for this new tool within our existing client base in other parts of the world.

Anforderungsprofil

What you provide (see also above):

- You study computer science, information technology, electrical engineering, communications engineering or similar.
- You understand Spanish (if you also understand Catalan it is a plus) as it is spoken on Spanish radio.
- Affinity for software and interest in the TV / radio environment.
- You have already programmed something, for example as part of a study or master thesis or as a working student.
- If you have already been in contact with signal processing, FFT, DNN, MFCC or ASR, these are pluses (but not a prerequisite).
- Analytical abilities, passion for learning.
- You speak English or German sufficiently for communication.

You also have the ability to work in an unstructured environment with an international team and are able to prioritize and implement your tasks independently. Do you enjoy breaking down complex tasks into their single components, design solutions and integrate them? Great, we look forward to hearing from you.
