NALA.care GmbH

Job-Titel:
WANTED: Entrepreneur in Residence at high-growth "Digital Health“ startup

Job-Beschreibung
NALA.care’s vision is to empower 2 billion people worldwide suffering from eczema (= "Neurodermitis") and other chronic skin conditions (like acne, rosacea, psoriasis, chronic urticaria etc.)

We are already supported by institutions like EIT Health / EU, the Charité in Berlin, the Swiss innovation cluster “Innosuisse” and many others -- and even got invited to Y Combinator for interviews for their next batch.

We are starting with eczema/atopic dermatitis (and will continue with other chronic skin conditions like psoriasis, rosacea, acne etc.) since both of our co-founders already had experiences with it, either himself as a patient or as a father of a child with eczema. That’s why we understand the challenges and the patient journey exceptionally well.

We do this by providing the "digital therapeutic" (= AI- and App-based therapy) for people with chronic skin conditions. Our aim is to provide the fast-track to a happy skin by cutting the time from diagnosis to a happy skin from many years/decades to just a couple weeks with the help of AI.

We are currently looking for a rock star to join our young and highly driven team:

>> Assistant to the Founders (Internship) ( see www.NALA.care/AF ) = a driven, soon-to-be company building expert

Voluntary internships are also possible.

For general information about working with NALA and general, profile-independent requirements, please have a look here: www.NALA.care/JOIN

If you’re interested, please see drop us a line at people@nala.care -- we’re looking forward to hearing from you! :-)

Looking forward to hearing from you!

Best

NALA -- Your fast-track to a happy skin!
